## The HOME of GOOD SEEDS Bulbs, Plants and Nursery Stock

**Farmer's Home and Rest — Warm Stove — Easy Chair**  
Established Forty-four Years Ago

**A FRIENDLY TIP:** Plant a home garden this spring. A healthful exercise and a swat at the **High Cost of Living**. The **city man**, the **suburbanite** and the **farmer**, too. Any farmer can save \$500.00 a year with a good home garden.

**CATALOG:** In handing you our **Economy edition** semi-descriptive catalog we wish to express our thanks and appreciation and good will in days gone by.

**Disclaimer:** While we exercise the greatest care to have all seeds pure and reliable, it is positively understood we sell no seeds, plants, bulbs or nursery stocks with any warranty expressed or implied in any respect and will not be in any way responsible for the crop.

## HOW to make a lawn

In preparing a seed bed so as to insure an everlasting lawn, it is well that the earth be stirred deeper than merely scratching the surface, either with a good stirring plow or spade to the depth of a foot or 15 inches, or even more. This is the first step to be taken, and the next consideration is the fertility of the soil where you are making the lawn. Among the various methods which increase the fertility of the soil we find that **Humus** plays a most important part. The very best time to do the work of preparing the soil for a lawn is in the autumn season and then left for the winter. The soil is solidified by the winter condition. Then in the spring the surface should be slightly stirred and the seed sown, well raked and rolled. When the summer is over and the winter comes on again, the lawn needs attention, and it is a wise plan after the ground is slightly frozen to cover it with a moderate coat of well rotted manure. In the springtime before the growth of grass has started, this coat of manure should be well raked in the soil, and the roughage raked off, giving the grass a chance to get plenty of sunlight. Should, however this be overlooked in the autumn, then in the springtime again it is well to apply a moderate amount of sheep manure, phosphate or ground bone fertilizer, well raked into the soil just as soon as is possible and at such time it is well to apply a sprinkle of our blend of **Reseeding Lawn grass seed**.

These suggestions in regard to the making of a lawn will well repay the time and expense by the increased growth of grass.

American Aster

Double Nasturtium

## FLOWER SEEDS

**ZINNIAS, PETUNIAS, NASTURTIIUMS, SWEET PEAS, ASTERS, PANSIES and MARIGOLDS** according to our data of sales are the most used flower seeds. More of these varieties planted than most any other kind of flower seeds. Our selections listed here are of the best varieties of these kinds. The latest improved by cross fertilization known-grown by specialists in flower seed growing. Especially do we recommend our **Dahlia Type** of Zinnias. Blooms in June until frost.

**Marigold and Zinnia**  
Marigolds and Zinnias bloom longer in season, and as cut flowers in a vase last longer in bloom than any other combination of cut flowers.

**In Combination**  
Plant in a row, two red zinnias, one Prince Orange marigold, 18 in. apart. Gives when blooming the beautiful effect of the scarlet and the golden.

VEGETABLE KINGDOM VS. ANIMAL KINGDOM

Life on this earth is divided into two great kingdoms; the vegetable kingdom and the animal kingdom. These two kingdoms are again divided into wild life and domestic life. Vegetable kingdom is the old kingdom. The animal kingdom lives on the vegetable kingdom. Everything that we eat and wear comes from Mother Earth through the activities of plant life—the Vegetable Kingdom. “All flesh is grass”. Wild life is more resistant than domestic life which has been brought up to the high state of perfection we find it today from the wild life by the artificial effects of man’s labor and ingenuity—up and out of the fathomless past. Insects prey on domestic life rather than wild life for the reason that domestic plants furnish more succulent food. We protect domestic plants against these inimical things by insecticides and other remedies. See page 21.

Parcel Post extra — See Page 2

**ROSE DISEASES**

The rose faces four deadly menaces, any one of which would destroy the rose garden if left unchecked. **Black Spot** presents the greatest Problem. Easily controlled if one starts making exterminating applications when the leaves first appear — additional applications week or ten days later if necessary. **Mildew**, leaf-eating insects, and aphids are the other controlled in the same way as Black Spot either by dusting or spraying will exterminate these diseases. Insecticide page 21.

Tri-Ogen, per Kit \$1.50

Chinese Elm

**NATIVE SHADE TREES**

Price Per Each
